

To OTICO customers in Russia

Dear customers,

Let us introduce our new partner – an authorized supplier of bearings for closing wheels OTICO – FKL factory (Serbia). FKL brand has been familiar to OTICO as a manufacturer with a long history and impeccable reputation, however, our cooperation has just started in 2020.

Laboratory tests, farmers' feedback and last but not least the brand authority are key criteria for the choice of a supplier as a bearing is the component which affects the operation of a single wheel as well as a machine.

FKL bearings come up to OTICO quality standards so we are certain that close cooperation of two European companies in contrast to Asian based manufacturers puts emphasis to OTICO strivings for excellence rather than costs optimization at the expense of quality.
